

IN THE CLAIMS

Claim 1 (currently amended): A gasket, wherein a packing (3) is firmly fixed to one surface of a plate (2) with a predetermined plane arrangement, said plate (2) is screwed to an opposing assembly member (4) in a screw fixing portion (5) at a time of assembling, said packing (3) is bent to one side in a width direction by being compressed in a lip portion (7) by said opposing assembly member (4), and a packing extension portion (9) for partly enlarging an adhesive bonding area of said packing (3) to said plate (2) is provided in a position close to said screw fixing portion (5), an inflection portion (8, 10) or a position close thereto in a plane shape of said packing (3).

Claim 2 (currently amended): A gasket, wherein a packing (3) is firmly fixed to one surface of a plate (2) with a predetermined plane arrangement, said packing (3) is bent to one side in a width direction by being compressed in a lip portion (7) by said opposing assembly member (4), and a packing extension portion (9) for partly enlarging an adhesive bonding area of said packing (3) to said plate (2) is provided in an inflection portion (8, 10) or a position close thereto in a plane shape of said packing (3).

Claim 3 (currently amended): A gasket, wherein a packing (3) is firmly fixed to one surface of a plate (2) with a predetermined plane arrangement, and a packing extension portion (9) for partly enlarging an adhesive bonding area of said packing (3) to said plate (2) is provided in an inflection portion (8, 10) or a position close thereto in a plane shape of said packing (3).

Claim 4(currently amended): A gasket as claimed in claim 1 ~~any one of claims 1 to 3~~, wherein said gasket ~~(1)~~ is constituted by an integrally formed gasket in which the packing ~~(3)~~ is integrally formed in the plate ~~(2)~~, and a pouring hole ~~(12)~~ of a gasket forming material of a metal mold ~~(11)~~ at a time of integrally forming the gasket is arranged on the packing extension portion ~~(9)~~.

Claim 5(currently amended): A gasket as claimed in claim 1 ~~any one of claim 1 to 4~~, wherein said gasket ~~(1)~~ is used as a cover gasket for an electronic equipment.
